	Examiner Len Tran	Art Unit 1725	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

1. Applicant's election of group Ia, claims 1-10 in the reply filed on 11/01/04 is acknowledged. Because applicant did not distinctly and specifically point out the supposed errors in the restriction requirement, the election has been treated as an election without traverse (MPEP § 818.03(a)).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1, 2, 4-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Keller et al (US 4,145,595).

As to claims 1, 2, 5, 6 and 10, Keller et al disclose a welding implement comprising a torch head (10) and a thermal storage member (27) adapted to absorb heat from the torch head (10), wherein the thermal storage member is electrically isolated from the torch head by insulator (28) shown in figure 3.

Art Unit: 1725

As to claim 4, further comprising a electrically conductive tube (26) to conduct electricity and gas to the torch head, wherein the thermal storage member is disposed around at least a portion of the tube (figure 3).

As to claim 7, wherein the tube (26) is a first conductive metal and the thermal storage member (27) is a second conductive metal.

As to claim 8, the torch is capable to be air-cooled and operable to conduct 300 Amps at a 60% duty cycle with a temperature increase of less than 30K.

As to claim 9, a second tube (31) disposed around the portion of the tube (26).

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over Keller et al (US '595).

As to claim 3, Keller et al fail to teach thermal storage member being aluminum. However, such type of metal would have been obvious to one of ordinary skill in the art, since aluminum is known to be a conductive material and selecting an appropriate material depends on the design expediency.
